

Inter-Vehicle Communication: ~~quo vadis?~~

Panel statement by Hannes Hartenstein

Europe: C2C-CC MoU → There will be „something“ for Cooperative ITS
US: mandating the use?
→ from 2015 onwards: there will be „something“, but not necessarily IEEE 802.11p (at least, not from the start)

Coexistence of deployment and research&development → “hybrid research”:
“services and science”

Focus on in-depth treatment of modeling and optimization

Focus on applications and their dependability

Focus on IT operations: cloud integration and security management

Make data from field operations available
